- 150 psi maximum working pressure.

- 6 ft. heavy duty air hose.

- Large 9.1 gallon capacity.

- Extra heavy duty construction (see design specification below).

WHY MAKE COMPROMISES WHEN IT COMES TO YOUR SAFETY? WE HAVEN'T!

WHAT WE DO:

This receiver complies with OSHA standard 1915.172 (paragraphs A thru C).

Each tank is registered with the National Board of Boiler and Pressure Vessel Inspectors. A "Manufacturers Data Report" is also supplied with each tank, assuring compliance with A.S.M.E. code.

Each vessel is registered and accepted in all provinces of Canada.

Each receiver is hydrostatically tested at 225 psi.

Recommended inspection every 10 years.
(Please refer to owners manual for details.)

Heads and Shell constructed of heavy gauge high strength (.094 thick) Carbon Steel that meets A.S.M.E. material requirements. All welds performed by Qualified welders.

Safety pressure relief valve complies with A.S.M.E. Code Requirements.

Drain port provided at the bottom of each receiver. Drain valves are available as an option.

6 foot industrial strength hose supplied with every vessel for ease of use.

* Design specifications subject to change without notice.
